

# AWS ASSOCIATE

## Course Description

Architecting on AWS is designed to build foundations of IT infrastructure on AWS. This course will help architects in optimizing the usage of AWS cloud by getting to know about AWS services and how these services complement the cloud-based solutions. Architectural solutions usually differ for different industries, size of business and the type of apps involved, and AWS provides best cloud practises and designs for helping students think the entire process of architecture. This course includes case studies to give them real time problems exposure and let them know the approach they should follow. Hands-on experience is given to build a variety of infrastructures.

## AWS Associate Course Content

<b>Module 01</b> : Design Resilient Architectures
<b>Module 02</b> : Design High-Performing Architectures
<b>Module 03</b> : Design Secure Applications and Architectures
<b>Module 04</b> : Design Cost-Optimized Architectures

## What We Try to Give

We try to give you real industry standards with best possible quality to all our customers and clients. We focus on various sections of Society and running a national level campaign to literate Students from all parts of company who can't Afford "Basic IT Computer Training". We wish we could teach as many students from all over the world and make it a beautiful place to work. We work on minimum gross margins to strength the Indian It infrastructure.
