

PYTHON WITH DATA SCIENCE

Course Description

Python with Data Science is an easy to learn and powerful programming language. This is one of the best reasons for beginners to learn Python. When you first start with python programming language and coding, you don't want to start with a programming language that has tough syntax and weird rules, as compared to other programming languages. Python is both readable and simple. It also easier to set up, you don't need to deal with any classpath problems like Java or compiler issues like C++.

Python Data Science Course Content

Module 01 : Python – An Introduction	Module 15 : Python Date & Time
Module 02 : Comparisons of Python with Other Language	Module 16 : File Handling (Input / Output)
Module 03 : Python Variables & Data Types	Module 17 : Multithreading
Module 04 : Operators	Module 18 : Python Mail Sending Program
Module 05 : Python Conditional Statements	Module 19 : Database Connection
Module 06 : Python Looping Concept	Module 20 : OOPs Concepts
Module 07 : Python Control Statements	Module 21 : Interacting with Networks
Module 08 : Python Data Type Casting	Module 22 : Graphical User Interface
Module 09 : Python Number	Module 23 : Python Web Scraping
Module 10 : Python String	Module 24 : Python for Image Processing
Module 11 : Python List	Module 25 : Python Data Science
Module 12 : Python Tuple	Module 26 : Intro with Python Matching Learning
Module 13 : Python Dictionary	Module 27 : Intro with Python Artificial Intelligence
Module 14 : Python Array	

What We Try to Give

We try to give you real industry standards with best possible quality to all our customers and clients. We focus on various sections of Society and running a national level campaign to literate Students from all parts of company who can't Afford "Basic IT Computer Training". We wish we could teach as many students from all over the world and make it a beautiful place to work. We work on minimum gross margins to strength the Indian It infrastructure.
