- ▶ We have expanded our ground on franchise opportunities as we have made our franchise partners in India and Nigeria and are planning to take it to a whole new level by taking our franchise partnership to some more nations of America and Europe.
- ▶ From its founding day till now, Craw Cyber Security has become a benchmark in the field of VAPT Service Providers in Computer Network Security and Ethical Hacking.

# GET CYBER SECURITY PORTAL IN YOUR HAND !!

We have engaged a team of experienced working professionals and tech gurus who will testify and provide their NEXT LEVEL expertise to your organization via some industry-led solutions in the following services.

## ▶ Application Penetration Testing

It is a function in which our professionals try to do multiple features consisting of authentication, authorization, encryption, logging, and application security testing in a concerning IT Infrastructure with the intention of exploiting the application servers in real-time circumstances. Craw Security provides its valuable VAPT services in start-ups from multiple nations like India, Canada, the UK, the USA, Dubai, and many more.

## ▶ Red Teaming Assessment Service

It is almost like a Pentest that is performed by our Red Team in order to penetrate and assess a crucial database in any possible way. The sole aim of the Red Team is to intrude the system, networking, or IoTs and assess the sensitive info just like a potential hacker and file the insights in a productive manner for representing it to the company itself.

## ▶ Blockchain Security

It entirely runs on the concept of decentralized distributed digital ledger. Transactions are confirmed within the blocks authenticating that each transaction is real and true utilizing cyber security frameworks. We perform these Blockchain PT by a genuine group of cyber security professionals functioning in the industry for more than 10 years of experience with some of the highest certifications of the domain.

## ▶ Mobile Application Penetration Testing

The countries in the world are more connected to one another via smartphones and hence, everything is shifting in the form of Mobile Applications inside smartphones. We are one of the best Source Code Review companies that are capable to think beyond the limits of others and therefore, can track, detect, review, and restore the bugs we found via the Mobile PT Procedures via our expert team of professionals having varied certifications like CEH, CREST, OSCP, CISM, CISA, CISSP, and ISO 27001 and experience in numerous organizations.

## ▶ Network and Wireless Audit

Wireless and Network Penetration Testing Solutions confirm the network security protocols and conditions status at the moment. The bugs found out by the genuine Network Pen Testing used for correcting the security threats that can potentially harm the database of the corresponding Network of an organization

## ▶ Server Hardening

Server Hardening stands for transforming a soft penetration server into an agile one that is impenetrable to damage by the continuous cyberattacks which are casual nowadays on IoTs. Craw Cyber Security offers its best Server Hardening Solutions to varied organizations and Start-Ups in multiple nations like India, Singapore, Dubai, Canada, the U.K., and the USA, etc. for the sake of creating a safe & secure cyber platform to work upon without any malicious activity.

## ▶ Client-Side Software Testing

This is a service provided to clients by Server-side testing that allows the test cases to be decided from the backend before serving the end-user. We offer Client-Side Software Testing Solutions to the booming entrepreneurs in the IT industry to well-established organizations at cost-efficient prices not to put a harsh load on anyone's pocket and give them value for their hard-earned money.

## ▶ Network VAPT Penetration Testing

We are one of the finest companies in India that process the Network VAPT Penetration Testing for the varied organization by putting our experienced professionals to extract the security loopholes, examining the threats, and fixing the vulnerabilities with genuine and authentic tools and software we possess solely for filling the purpose of providing crucial Network VAPT Solutions in India as well as to overseas nations like Singapore, Canada, Singapore, Malaysia, U.A.E., U.K., and the USA, etc. in order to secure the database our clients in a genuine tone.

## ▶ Source Code Review

This authentic service provided by Craw Cyber Security to the Start-Ups and well-established organizations to check the particular line of code which is weak and fix it with the expertise of our team of expert professionals in the domain for years and securing the database of hundreds of our satisfied customers with zero concerns in India, South Africa, Nigeria, UK, USA, Canada, Singapore, and other countries on the planet.

## ▶ ISO 27001 Consulting Service

ISO 27001 Consulting Service allows us to take up the ownership of the lead auditor by collaborating among all departments of the company. It provides a piece of brief information about the list of controls that should be considered along with the code of practice ISO / IEC 27002:2005. We, at Craw Cyber Security, do this task with the support of essential toolkits, software, and the professionals that make it done at an ease with the years of genuine practice the same procedure for varied organizations and start-ups.

## ▶ Cloud Computing Penetration Testing

This is the most booming sequence in the charts of Cyber Security where maximum organizations are translocating their data towards the secured cloud servers on different platforms offered by major companies like Google, Amazon, and Microsoft, etc. Craw Cyber Security provides its genuine and authentic Cloud Computing Penetration Testing Solutions to the enterprises via a method of analyzing the cloud system by imitating the attack from a Black Hat Hacker through our team of professionals possessing real expertise in the domain by practicing it for years, especially for Craw Cyber Security.

## ▶ Web Application Security

Craw Cyber Security is also the Best Web Application Penetration Testing Company in India doing this for its worthwhile client agencies and start-ups for years with maintaining a sound business relationship with them. Our Web App PT domain experts make sure that not a single loophole in the form of threats and vulnerabilities is left unseen while performing a series of attacks on the Web Application with the intention of hacking it like a potential hacker in crime. For assuring this we also use our theory of obtaining OWASP Top 10 Vulnerability Test as well as SAMS Top 25 Vulnerability Test in practice.

Cyber Security is the best in booming domains among the IT Industries and hence having such VAPT activities in your possession will definitely benefit you in every aspect. Craw Cyber Security has become a benchmark in the domain of spreading Cyber Awareness and giving crucial knowledge via our genuine Cyber Security Courses through both online and offline methods.

### ▶ IoT Internet of Things Pentesting

This high-end IoT Pentesting Service offered from the house of Craw Security's VAPT Services checks all the available security flaws in the IoT devices that can be hacked by a black hat hacker utilizing one's best black hat hacking practices.

### ▶ Spear Phishing

Spear phishing VAPT Service implemented by Craw Security is generally an additional specialized type of phishing attack that focuses on a particular user, thanks to personal information gleaned from online sources.

### ▶ End Point Security

Endpoint Security can be termed as security the IoT devices by safeguarding them with the end to end encryption by some specialized techniques employed by a professional pen-tester.

### ▶ HIPAA Compliance Consulting

Craw Security also offers HIPAA (Health Insurance Portability and Accountability Act of 1996) compliance consulting services, which is basically a federal law that needed the establishment of national standards to safeguard some crucial patient information, which can never be afforded to lose, from being revealed without the patient's consent or knowledge.

### ▶ Risk Assessment

In the highly preventive service of Risk-Assessment, we check what kind and extent of hazards presently exist or may appear in the future at a workplace that can sincerely cause information breaches. Moreover, a risk assessment defines which workplace hazards can potentially cause harm to employees and visitors' databases.

### ▶ Security Awareness

We offer our prominent Security Awareness Services in which we offer our primetime cyber security pen-testers that enhance the security awareness of your employees so that they can nicely tackle various ill-situations of cyber attacks dedicatedly.

### ▶ External & Internal Infrastructure Testing

In the External Infrastructure Testing & Internal Infrastructure Testing, we check for all the potential vulnerabilities and shortcomings in the available spots that can sincerely give the backdoor entry to the black hat hackers.

## ACCESSDATA

we are a prime partner of the FTK in India.

# FTK Forensics Tool-Based Training and Certification

Craw Cyber Security Provide FTK Tool-Based Training and Certification in Cyber Security with Various Forensics Tools.

AccessData has worked with more than 130,000 clients in law enforcement, government agencies, corporations, and law firms around the world to understand and focus on their unique collection-to-analysis needs.

## Training Alone Is Not Enough

Employers agree that you need a certification to validate your skills. 88% of employers believe it's important to give test after training to confirm knowledge gains.

# 98%

cite at least one specific benefits of certification testing rather than training by itself, such as:

- Better validation of knowledge learned / skills.
- Increased value / credibility of the training.
- Increased / improved knowledge.
- Demonstration of abilities.
- Skills and knowledge retained for a longer period of time.

97% of employers value certification enough to provide support for IT employees obtaining IT certification.
